

MSCP WORKSHOP

Friday, December 9
10 a.m. - 12 p.m.

Join us online for a virtual public meeting on the Multiple Species Conservation Program (MSCP).

The MSCP was developed to preserve a network of habitat and open space, protecting biodiversity and enhancing the region's quality of life. This workshop will focus on local, State, and Federal partners' MSCP 2021 accomplishments including habitat acquisitions, management, and monitoring. The workshop provides an opportunity for the public and interested parties to learn more about unique habitats in the San Diego region, the role of the MSCP in preserving open space, and regional conservation and management efforts.
